

In the claims:

1. (Original) A loudspeaker copper foil wire comprising a copper foil wire body impregnated or coated with a flame resistant wax, the flame resistant wax comprising a petroleum paraffin wax and 5wt% to 50wt% of a halogen-free aromatic condensation phosphoric ester flame retardant.

2. (Original) A loudspeaker copper foil wire as set forth in claim 1, wherein the halogen-free aromatic condensation phosphoric ester flame retardant has a melting point of 80°C to 140°C and a decomposition temperature of not lower than 250°C.

3. (Currently Amended) A loudspeaker copper foil wire as set forth in claim 1 ~~or 2~~, wherein the copper foil wire body includes a plurality of core threads each wrapped with a copper foil and braided or stranded.

4. (Currently Amended) A loudspeaker comprising:  
a magnetic circuit;  
a frame mounted on the magnetic circuit;  
a voice coil fitted in a magnetic gap of the magnetic circuit;  
a vibration diaphragm having an inner rim connected to the voice coil and an outer rim connected to the frame;  
an external connection terminal attached to the frame; and  
a pair of copper foil wires connected to opposite ends of the voice coil at one-side ends thereof and connected to the external connection terminal at the other-side ends thereof;  
wherein the copper foil wires each comprise the loudspeaker copper foil wire as recited in claim 1 ~~any of claims 1 to 3~~.
